Mobile Truck Wash

„The Washing Partnership“

# Mobile fleet washing

We wash the exteriors of all types of vehicles on the customer's premises. We own a complex system, which allows us to wash your entire vehicle fleet on-site. We will set up a washing station at your complex, where our drivers will gradually bring all your vehicles for washing. We then pack the washing station up and drive off. We leave nothing behind.

## Requirements for providing the service:

A 380 V electricity supply (cost max. CZK 4 / truck).

Connection to the water mains – regardless of pressure, we have our own equalising tank (cost max. CZK 11 / truck).

Access to the drains in order to discharge filtered wastewater (cost max. CZK 11 / truck).

# Our advantages

**We wash your vehicles while they are not in use**  
At the parking site, which saves costs for waiting at car washes and does not restrict your vehicles' work performance.

**High-quality washing by hand**  
Very gentle washing by hand using soft brushes is kind to your vehicles' paintwork and tarpaulins.

**Quick washing**  
LKW exteriors washed within 20 minutes.

**Without delays**  
No need to queue to use a built-in car wash.

**Ecological process**  
Minimum water and energy used.

**Without the need for assistance from your employees**  
No additional wage costs.

*We are Dirtbusters!*

## Mobile disinfection of transportation areas

Our company owns a licence and certification of professional competence to carry out special protective disinfection.

We carry out disinfection and cleaning of the cargo areas of refrigerated trucks and trailers.

We issue a record of disinfection.

## Mobile cleaning of vehicle interiors

We offer professional wet cleaning of vehicle cabins.

We disinfect air-conditioning systems using ozone.

We use our own electricity and water supply, which means we can provide this service anywhere.
